Introduction

A formal meeting was held between one of the stakeholders of Leo's Book Store and one of the software developers of the website. The goal of this meeting is to conduct a review of the requirements of Leo's Book Store. In this report, you would find reviews on the main requirements of the website which include requirements on the search and filter section of the website, the shopping cart, and the checkout section.

Reviews

Requirement	Description	Review
Changing Quantity	The customer could change the quantity of an item to add to the cart with a simple drop-down bar.	The software developer had done some tests on the online shopping system, and the results came out as a success. The user can change the quantity of an item between 1 and 10.
Remove Item	When in the shopping cart, the user could remove all quantities of a singular item with a click of a button.	It has been implemented with success. Users can remove a specific book from the shopping cart.
Search Bar	This Allows customers to find exactly what they need by typing in the title of the book.	Implemented, users can search for a book and have the online shopping system display the book.
Categories	The system displays books that are related to the selected category.	Tests were conducted and show that books will be presented based on the selected categories.
Payment Methods	Customers should have multiple options to pay for orders such as Credit cards and Paypal.	Implemented, users are prompted with a payment option of credit card and PayPal when they are on

		the checkout page.
